Outcome of Activity

Moot court is one of the most exciting activities for law students. The proceedings in a moot court mirror real-life court proceedings. Harnessing Renewable Energy

Jammu and Kashmir, a union territory rich in natural resources, has taken significant steps towards harnessing renewable energy for sustainable development. With the allocation of Rs. 100.05 crore under capital expenditure for Science and Technology in 2023-24, the UT aims to install solar and hydro power projects, establish innovation centers and demonstration farms, and provide financial support for research and development projects. Under the Pradhan Mantri Kisan Urjo Suraksha evam Utthan Mahabhayan, around 9000 solar agriculture pumps will be installed or replaced with an installed capacity of 90 megawatts. This initiative will not only reduce the dependence on fossil fuels but also help farmers in the region to reduce their energy bills. The Jammu Solar City Project aims to achieve a total of 200 megawatts of rooftop solar power plants, out of which 80 megawatts will be installed in 2023-24. This initiative will benefit around 20,000 households in the region, reducing their carbon footprint and contributing to the national goal of increasing the share of renewable energy in the energy mix. Under the Rooftop Solar Power Plants for domestic sector funded by the Ministry of New & Renewable Energy, 3000 households will be covered with an installed capacity of 10 megawatts during 2023-24. This initiative will not only help households to reduce their energy bills but also contribute to reducing greenhouse gas emissions. The Srinagar Smart City Project plans to install 3 megawatts of rooftop solar power plants in the city, covering 50 government buildings and 20 other buildings in different districts. The government aims to cover all government buildings in a mission mode, making the city more energy-efficient and contributing to sustainable development.
